

A vehicle is stolen approximately every 25 seconds.\*  
Don't become a statistic.

### **“Park Smart” With These Tips**

---

- Park in secured, well-lighted areas. Over 50 percent of vehicle thefts happen at night.
- Close all windows, lock all doors and take the keys with you. In Florida, 25 percent of stolen vehicles had the keys in them.
- Don't leave your original registration or title in your car. File the title at home in a safe place and carry your registration in your purse or wallet. When sharing a vehicle, provide a copy of the registration to other drivers to carry in purse or wallet.
- Activate any anti-theft devices you have anytime you vacate your vehicle.
- Never hide a second set of keys anywhere on your car.
- Never leave your car's engine running - not even in your driveway!
- Permanently mark your vehicle windows with your vehicle identification number (VIN) also known as VIN etching. VIN etching is difficult to remove.
- Park your vehicle in a garage if possible. Lock both your car and the garage.
- Park your vehicle with wheels turned toward the curb — even when parking in driveways and parking lots. This makes your vehicle difficult to tow.
- Don't become complacent because you drive an older model car. Older cars are often stripped for parts that are sold for two or three times the value of the vehicle.
