PEACE OF MIND FOR CAREGIVERS

OF PEOPLE AT RISK OF WANDERING

WHEN A LOVED ONE WANDERS OFF,  
THERE'S A WAY TO BRING THEM  
**BACK SAFE AND SOUND.**

# SafetyNet™

by LO/JACK®

It's simple and convenient to use SafetyNet's proven technology to find and rescue individuals with cognitive disorders (including autism, Alzheimer's and other conditions) who tend to wander and become lost.

## THE HELP YOU NEED, WHEN YOU NEED IT MOST

Caring for a loved one who wanders is a considerable responsibility. You keep a close eye on your loved one and know exactly where they are most of the time, but there's always that terrifying possibility that they may wander and become lost. SafetyNet™ by LoJack® helps public safety agencies quickly find and bring your loved one home, providing you with additional protection and peace of mind in your mission to keep your loved one safe.

## HOW IT WORKS

• Your loved one wears a SafetyNet Bracelet at all times. The Bracelet features a Radio Frequency transmitter that emits a continuous signal.

• When you realize your loved one is missing, you contact authorities immediately.

• Trained search and rescue teams in the coverage area use SafetyNet Search and Rescue Receivers to track the Radio Frequency signal being emitted from the SafetyNet Bracelet.

• Once public safety officers locate your loved one, they can rescue and return him or her home safely.

## WHY SAFETYNET™ BY LOJACK®?

### PROVEN TECHNOLOGY

Radio Frequency technology can work in densely wooded areas, buildings and shallow water, even when GPS and cellular technology cannot.

### WE WORK DIRECTLY WITH LAW ENFORCEMENT

Law enforcement and other public safety agencies are trained, certified and equipped with SafetyNet Search and Rescue Receivers. In addition, personnel are trained on how to effectively communicate with people who have cognitive conditions.

### COMPREHENSIVE SUPPORT SYSTEMS

The SafetyNet service includes a secure database of key client information to assist in search and rescue operations as well as 24/7 customer support.

### IT WORKS

Time and again, SafetyNet's proven technology, processes and procedures have successfully helped law enforcement and public safety personnel rescue at-risk individuals.

## PEACE OF MIND

When someone goes missing, every second counts. SafetyNet™ by LoJack® works fast to save precious time and precious lives.

“My son went missing at school, the police were called, and instead of walking around the whole building, they turned their SafetyNet antennae on and went right to him. It all happened so fast.”

-SafetyNet Caregiver, MN

“I'm sold on the program. I hope I never have to use it. I know that the police can be here in a second or two to find him.”

-SafetyNet Caregiver, NC

“If I blink he's gone, so we're on top of him all the time, but having the SafetyNet Bracelet ... it's an added security.”

-SafetyNet Caregiver, MA

“The Bracelet gives us more freedom to do what we want as a family.”

-SafetyNet Caregiver, MN

## SafetyNet™

by LO/JACK®

SafetyNet™ by LoJack® builds on LoJack Corporation's 25-year legacy of effective vehicle tracking and recovery using Radio Frequency (RF) technology. SafetyNet utilizes a variation of RF technology that is more appropriate for tracking people at risk of wandering and becoming lost.
